

MORE EFFICIENT INTEGRATED PAYMENTS.

Despite advances in automated payment technology, the industry is still wasting too much time and money on manual payments handling and reconciliation.

Don't let outdated payment systems and processes hold you back. eNett Virtual Account Numbers (VANs) are leading the way in automating payments. Here's how they're working for Vacations Made Easy.

Vacations Made Easy is a one-stop vacation planning and booking site, offering custom and pre-set vacation packages, which include activities and/or rooms for hundreds of locations all across the globe.

Challenge

Vacations Made Easy wanted to offer its customers the widest room options by participating in the Fully Independent Travel (FIT) programme for Choice Hotels - one of the world's largest hotel franchisors. They needed a virtual card solution that would allow them to get up and running quickly and participate in the FIT programme.

eNett Solution

Our comprehensive API was quickly and easily integrated into the existing booking system, allowing Vacations Made Easy to get up and running fast and start using VANs straight away. And due to our innovative pre-funded model, there were no laborious credit checks unlike most virtual card providers.

“ eNett has one of the easiest APIs we've ever worked with.

We were able to get it up and running within a week. ”

Eric Benson

Lead Programmer

(April 2013)

Results

Since using VANs for supplier payments, Vacations Made Easy has experienced significant efficiency gains. An agency turning over \$1M to \$5M typically needs one part-time staff member to manage and reconcile payments manually. For the largest agencies the cost can exceed \$6,000 a week!¹
