

MORE EFFICIENT INTEGRATED PAYMENTS.

Today, 40% of travel agencies worldwide settle payments through manual processes, costing the industry \$1.5 billion on manual processing and reconciliation¹.

So, it's no surprise that demand for payment automation is increasing and that eNett VANs are at the forefront of helping travel companies like yours, spend less time reconciling and more time selling.

VANs already simplify the complexities of payments for customers in 47 countries. Here's how they're working for MetGlobal.

MetGlobal is a major wholesaler of hotels and travel services, offering over 200,000 hotels across 198 countries through its MetGlobal Sourcing and HotelsPro brands. With over 500 staff in offices in Istanbul, New York and Dubai, MetGlobal provides travel solutions through various distribution channels.

Challenge

With offices across the globe, a lot of time was spent processing payments and reconciling transactions manually. MetGlobal required a virtual payment solution which could seamlessly integrate into its current booking systems.

eNett Solution

eNett VANs were seamlessly integrated with MetGlobal's existing systems via an API, facilitating quick and easy implementation. Employees were instantly able to make multiple bookings and secure payments globally.

“ We wanted a solution that could generate real benefits for our company, in terms of saving time and lowering costs. VANs have succeeded in doing just that, and the API made integration simple. ”

Mustafa Korkmaz

Managing Director

(June 2015)

Results

VANs are delivering significant time efficiencies and lowering costs through automated reconciliation for MetGlobal. Employees can now make instant payments directly from within existing workflows and reconciliation is now automated. VANs are also providing real-time reporting at their fingertips.
