

# FACT SHEET FOREIGN EXCHANGE.

## FX options for growth

International expansion is a strategy many travel companies use to grow their business. However, the high costs associated with cross-currency payments, and uncertainty with exchange rates can prove a barrier to expansion. eNett International is committed to lowering the cost of international payments, enabling agencies to expand their global footprint.

## Broad currency capability

eNett can generate VANs in over 30 currencies, 17 of which enable local funding and settlement. This eliminates the need to start new banking arrangements in each jurisdiction, and you won't be charged cross-border fees or be exposed to foreign exchange (FX) fluctuations on VANs funded and paid in the same currency.

## Suite of foreign exchange options

We offer a broad suite of foreign exchange options designed to lower costs and give agencies greater FX control:

### Self-Managed FX

Self-managed foreign exchange enables you to manage the most appropriate time and secure the best rates independently, before transferring into one of eNett's 17 different currency Pay-in accounts.

### MasterCard FX

As MasterCard is a strategic partner of ours, customers can save up to 2% on each international transaction with MasterCard foreign exchange<sup>1</sup>.

### Real-Time Conversion

Real-time conversion<sup>2</sup> gives agencies pricing certainty by enabling you to lock-in a rate at the time of the booking. And, you can quote a price to your customer without the risk of FX fluctuations eating into your margins upon settlement.

## Lower risk international payments

Sharing card details with unfamiliar suppliers in new regions can come with an increased risk of fraud. As a VAN is a unique 16-digit MasterCard number generated for each transaction, the risk of fraud is reduced. And the MasterCard Guarantee provides charge-back capabilities to provide protection against supplier default.
