

# FACT SHEET ACCESSIBILITY.

## Making the benefits of VANs accessible for all

Legacy systems and lack of interoperability can act as a barrier for agencies, preventing them from accessing the latest in payments technology. Lack of immediate payment capability can also see agencies miss out on dynamic rates. Added to this, the high cost of international payments, hindering access to international suppliers and content. With low cost, immediate payments that are accepted worldwide, eNett Virtual Account Numbers (VANs) allow all agencies to remove the barriers that impede growth and better service the needs of their customers.

### Access to dynamic content

With suppliers offering large discounts to optimise inventory, and an increasingly digital savvy consumer searching for the lowest cost deals, taking advantage of discounted rates with pre-payment is important to remaining competitive. The immediate nature of VANs allows agencies to access dynamic and net-commission rates. These savings can be passed on to your customers or used to boost your profit margin.

### Access to international suppliers without the high costs

A barrier to moving into new regions can be the high costs, and sometimes risks associated with international payments. Paying by VANs means you are automatically connected to any supplier on the MasterCard online network - that's over 35.9 million locations worldwide. And each unique VAN is protected under the MasterCard guarantee, including chargeback capabilities to lower the risk of fraud.

### Access to cutting edge technology

VANs seamlessly integrate with existing booking and accounts payable platforms. And because we have devised an innovative fund-as-you-go model, we can get agencies on board within days. This means you can take advantage of the latest in payments technology, regardless of booking or payments platform used.

### Access to rewards

Unlike some loyalty schemes that give rewards dependent on transaction volumes, the benefits and rebates available through VANs are offered from the very first transaction<sup>1</sup>.

## Access to multiple payment channels

Once you fund the Pay-in account, we offer our customers multiple ways to pay suppliers, so you can pick the option that suits you:

### 1 Within Travelport point of sale systems

With a simple VAN command, eNett returns card number, expiry and CVV details to the PNR. The agent never needs to leave their desktop.

### 2 Within eNett Payments Platform

Agents can easily generate card details within our web portal and transfer details into their booking. Real-time reporting and amending or cancelling VANs is simple.

### 3 Via eNett's Application Programming Interface (API)

Agents can generate VANs seamlessly from within their own booking system using a simple one-off API.

### 4 Via batch upload

Upload a csv file to generate multiple VANs and send for payment.
